

Installation Instructions

HIGHLAND
SCRUTINEER

To install, insert CD into the CD drive.
Open Explorer and navigate to the CD drive.
Alternatively, right click and save the download link and download the set-up file.

Windows 98/ Windows ME

Navigate into the Win 98 ME folder on the CD.

Double click and run Setup1.exe
The system may require a reboot.

Double click and run Setup2.exe
The system may require a reboot.

Alternatively, these files can be downloaded from:
<http://www.highlandscrutineer.com>

You can now install the main application setup (Setup.msi) as for Windows 2000/ Windows XP from the main CD folder or download file.

Windows 2000/ Windows XP

Double click Setup.msi and follow the installation instructions.

Depending on the installed Service Pack, you may receive an error message "Error 1931. The Windows Installer service cannot update system file. C:\WINDOWS\system32\hhctrl.ocx because the file is protected by windows. "

You should disregard the error (Press OK) and continue the installation.

However, it is recommended that you install the latest Service Pack from Microsoft.

Getting Started

The on-line help provides details regarding getting started and setting up your first competition.
